

Vertical and spatial distribution of Aerosol and Gases during the UWFPS

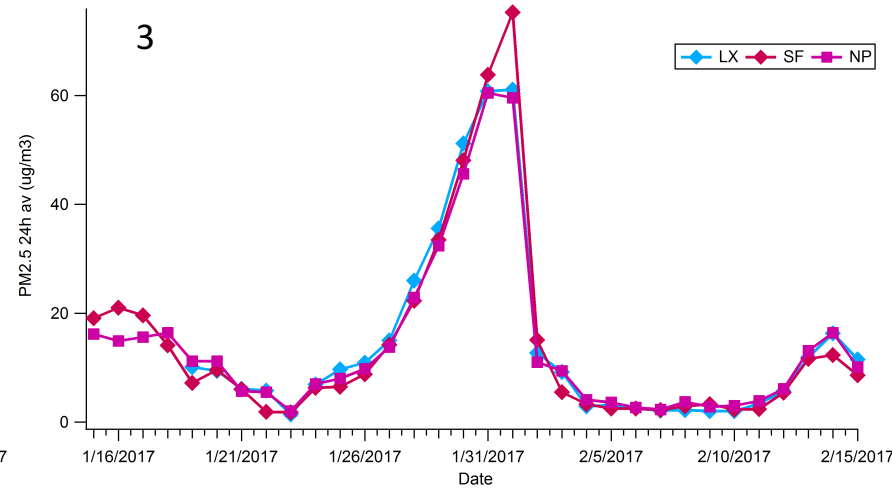

Alessandro Franchin

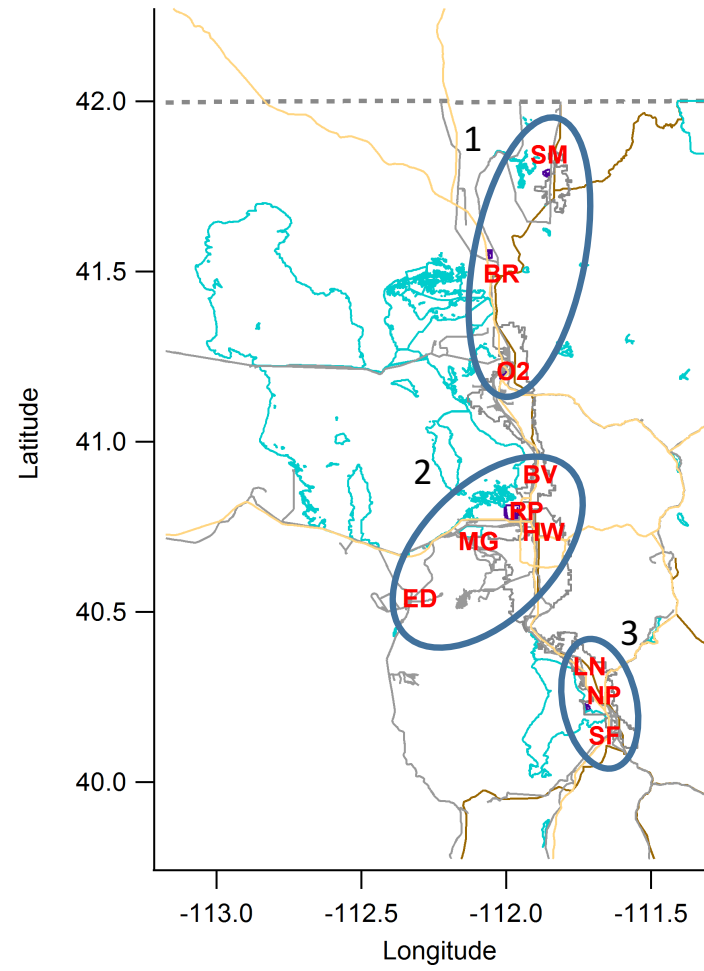

June, 29th 2017

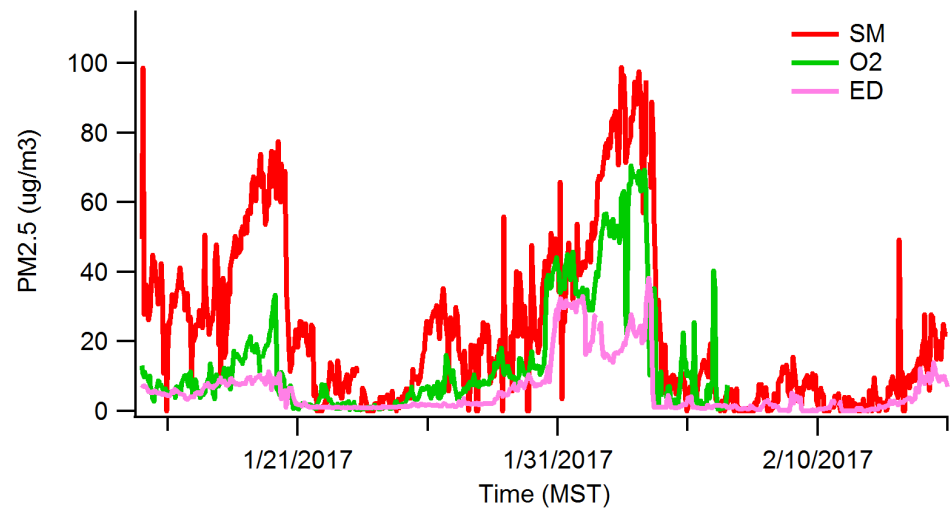

Pollution during winter inversion, a 2013 example

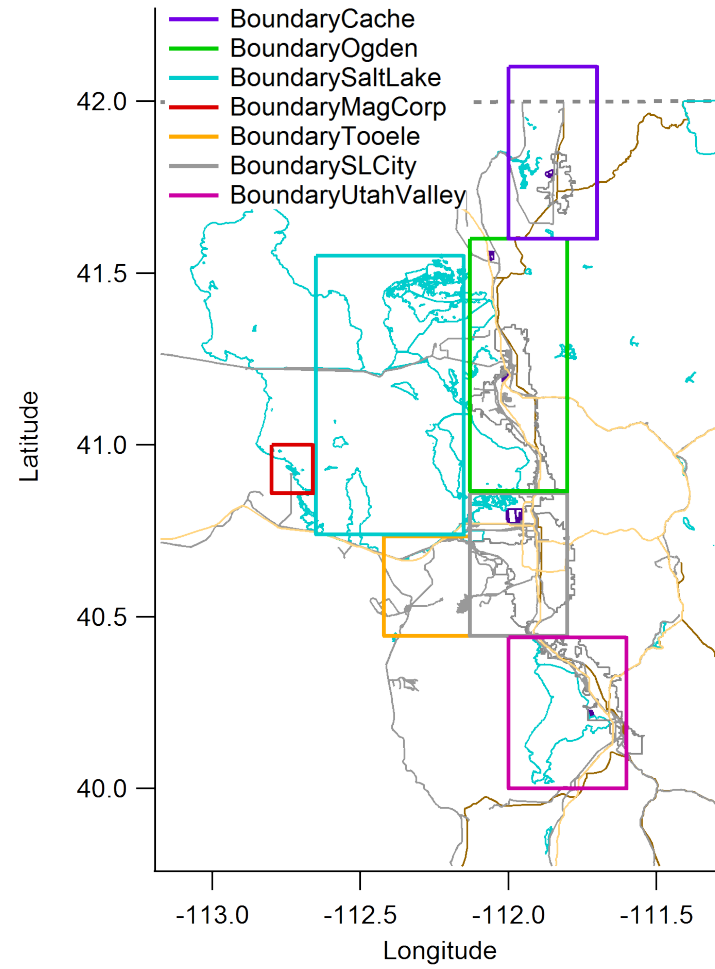

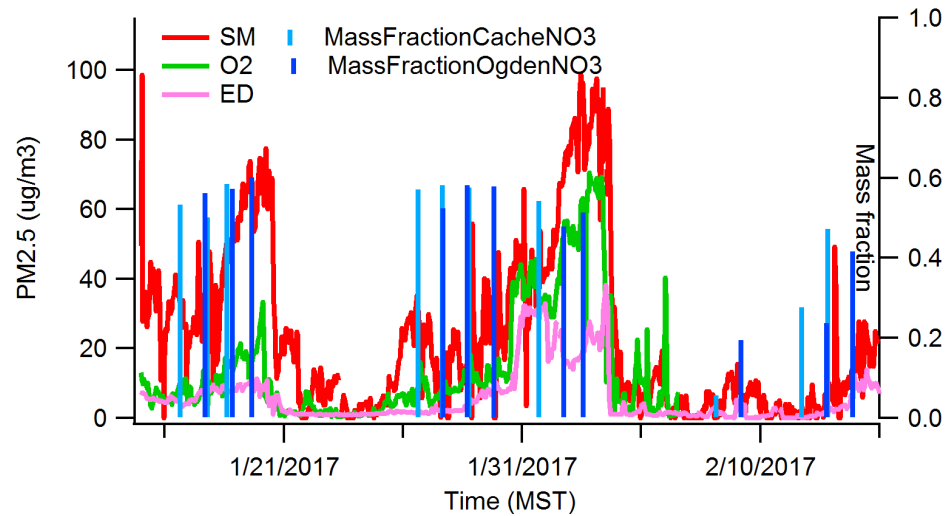

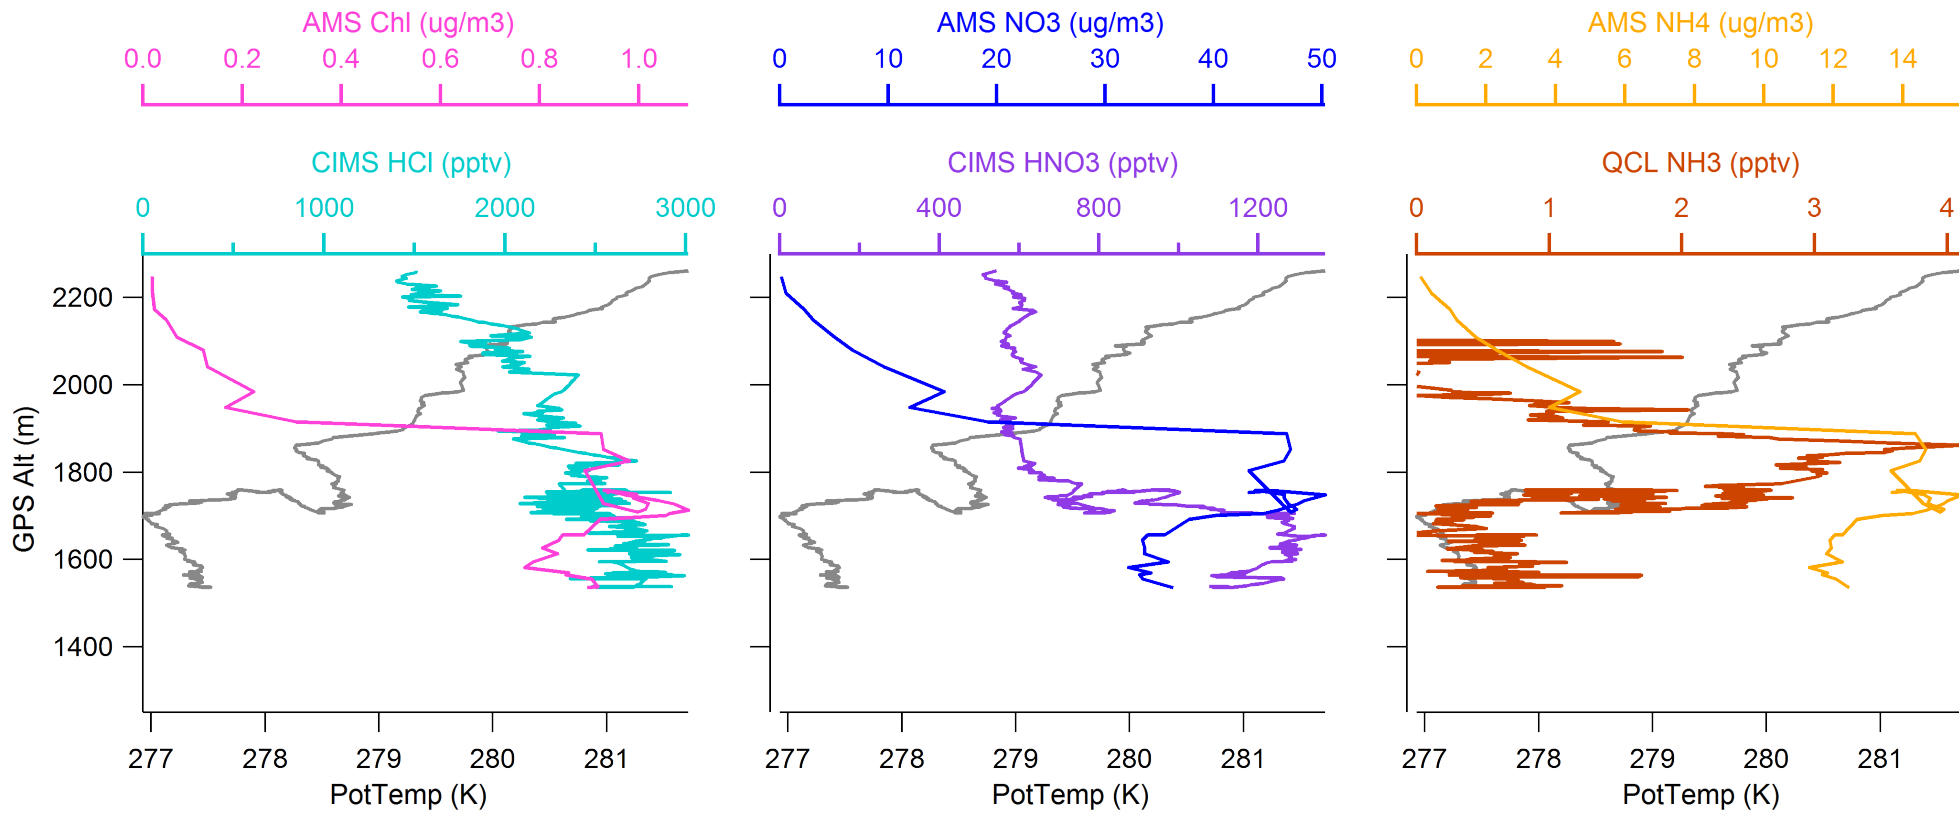

South Leg

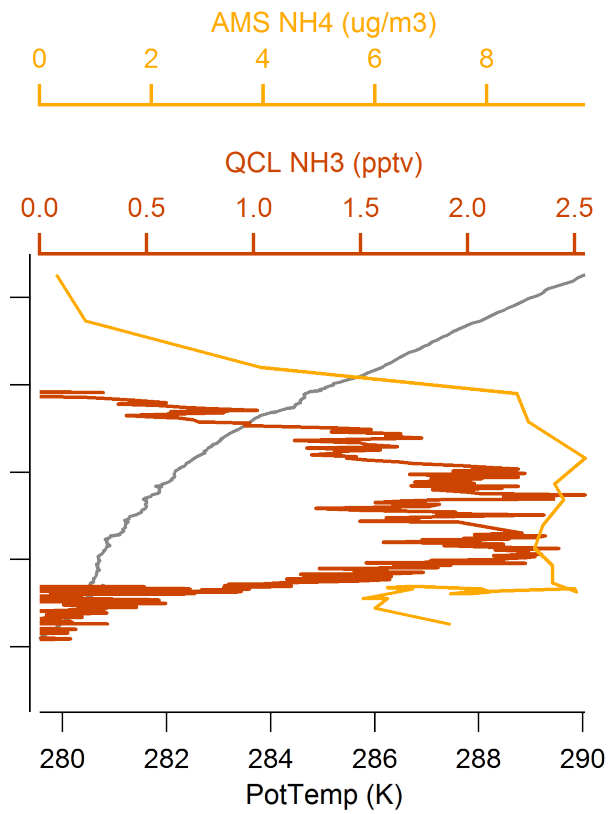

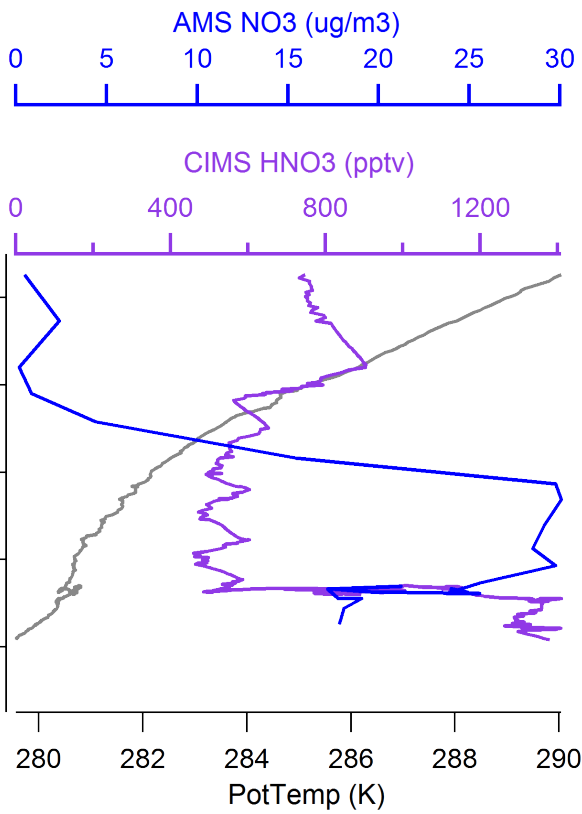

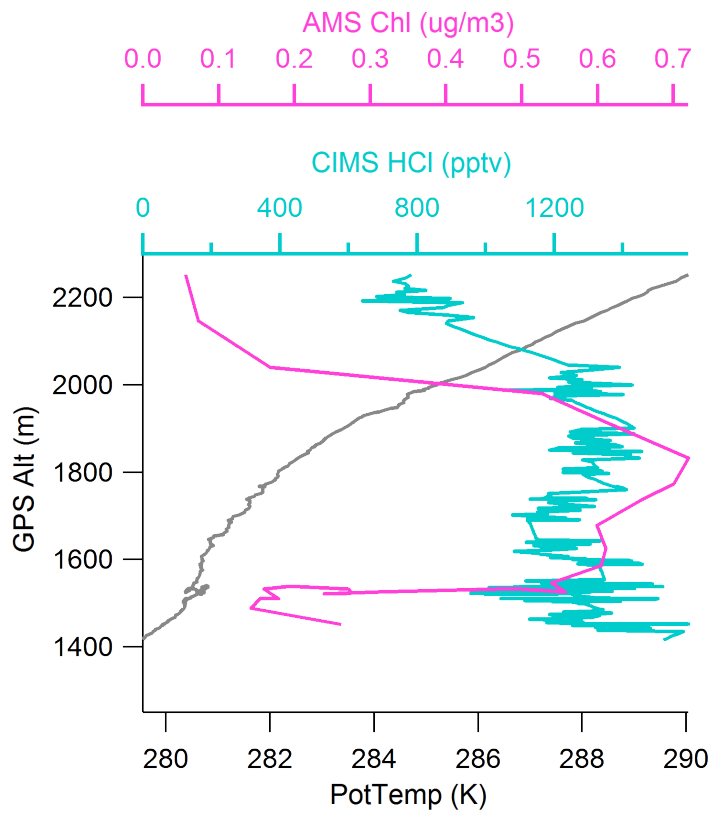

RF05

Start Lat, Start Lon
40.716, -112.12

Stop Lat, Stop Lon
40.495, -112.03

Mean Lat, Mean Lon
40.594, -112.06

Start Pt, Stop Pt
1240, 1710

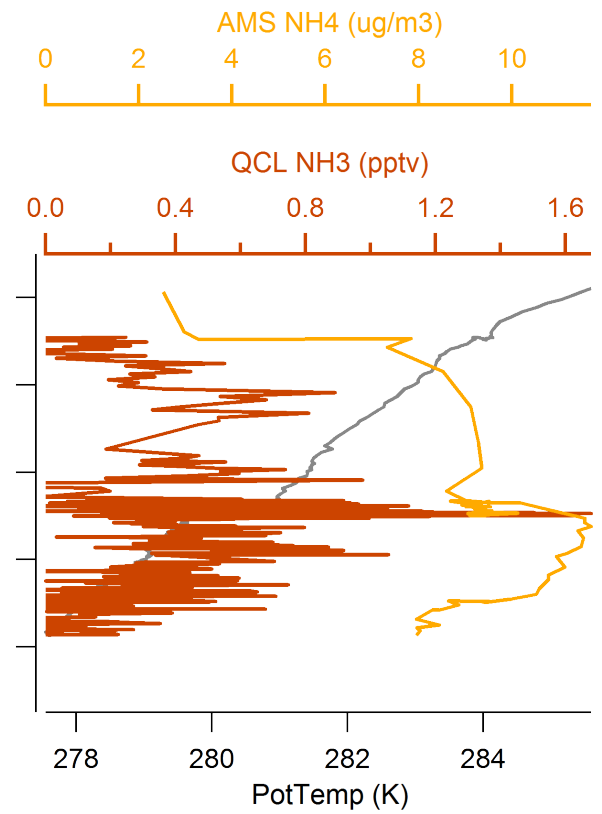

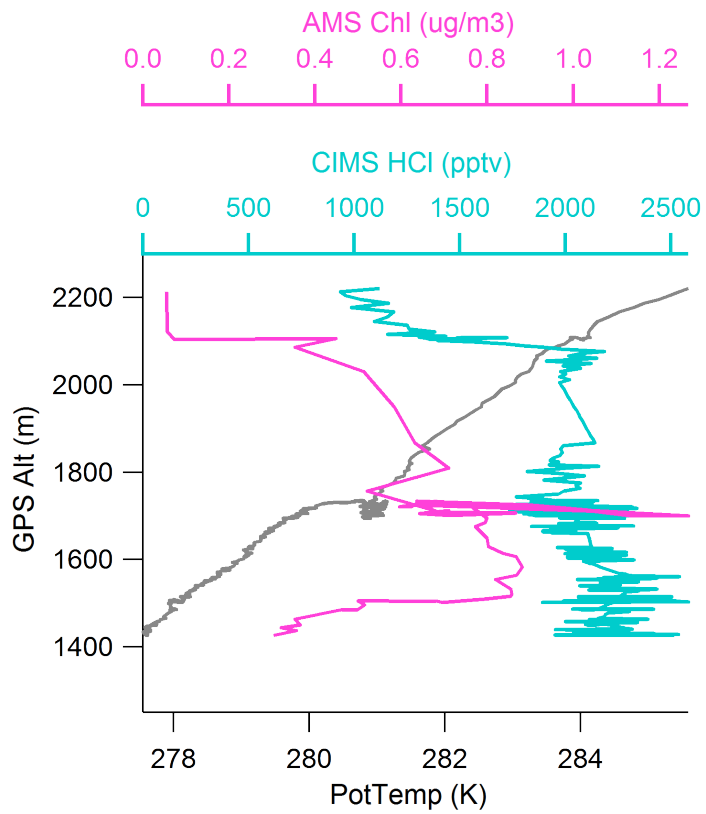

RF02

Start Lat, Start Lon
40.405, -111.79

Stop Lat, Stop Lon
40.235, -111.74

Mean Lat, Mean Lon
40.334, -111.79

Start Pt, Stop Pt
5010, 5499

RF02

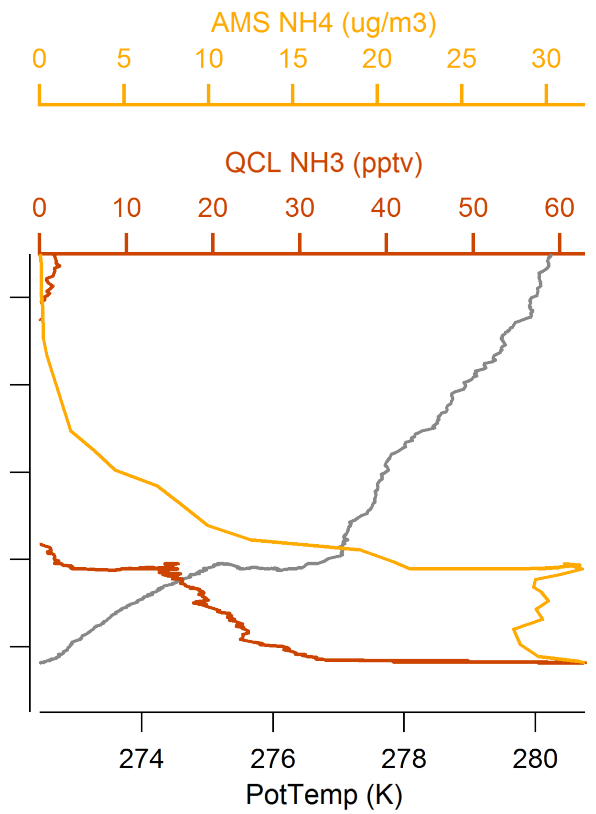

Start Lat, Start Lon
40.771, -112.18

Stop Lat, Stop Lon
40.496, -112.04

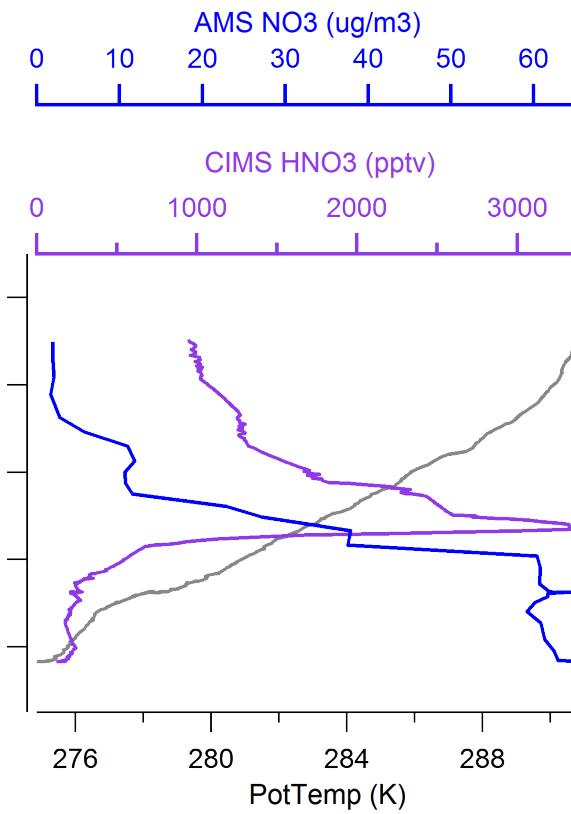

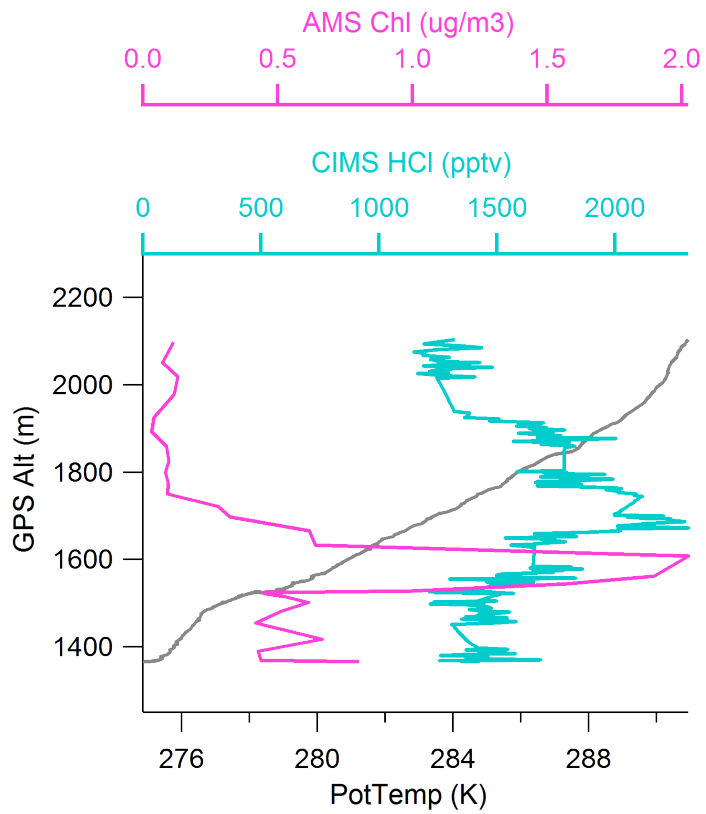

Mean Lat, Mean Lon
40.624, -112.07

Start Pt, Stop Pt
1468, 2114

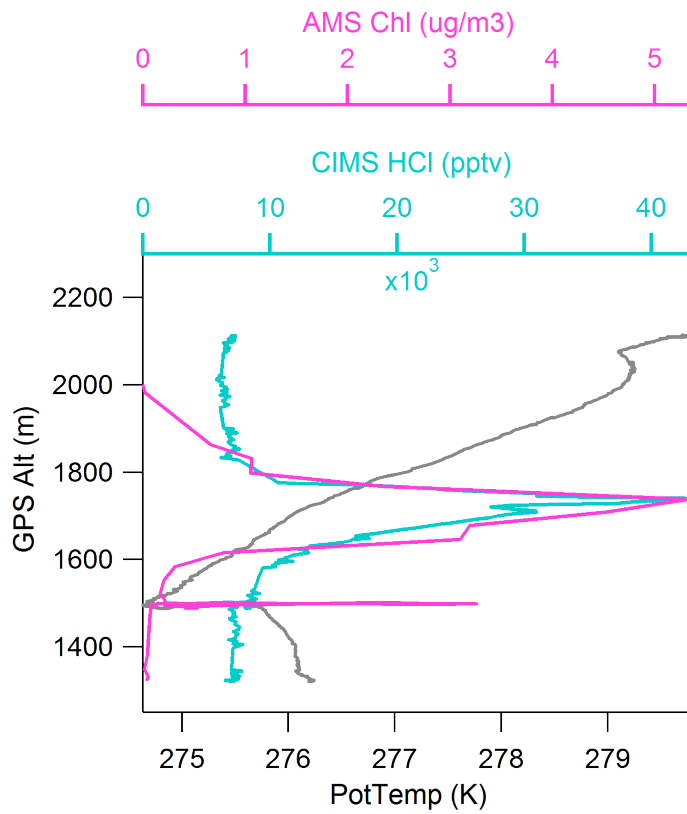

North Leg

RF01	Start Lat, Start Lon	Stop Lat, Stop Lon	Mean Lat, Mean Lon	Start Pt, Stop Pt
	41.57, -111.88	41.792, -111.85	41.653, -111.85	2512, 3008

RF04	Start Lat, Start Lon	Stop Lat, Stop Lon	Mean Lat, Mean Lon	Start Pt, Stop Pt
	41.604, -111.85	41.79, -111.85	41.699, -111.85	2556, 2874

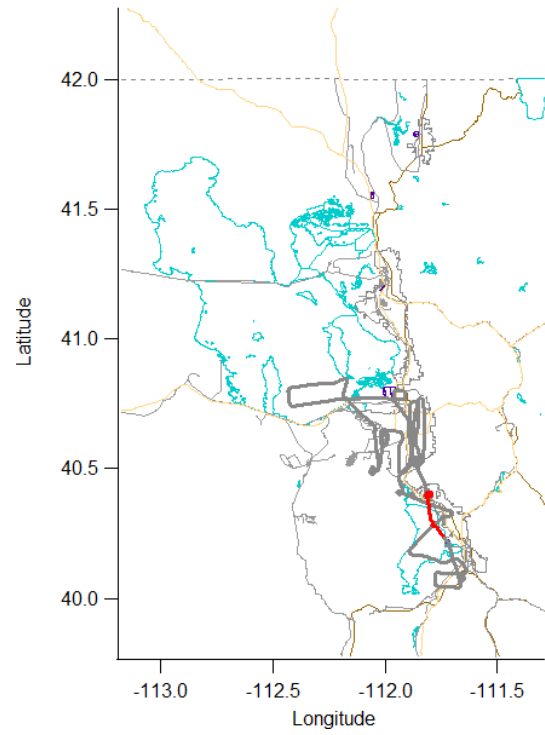

RF10 Start Lat, Start Lon Stop Lat, Stop Lon Mean Lat, Mean Lon Start Pt, Stop Pt
 40.912, -112.75 40.624, -112.35 40.763, -112.54 8247, 9045

RF02
 Start Lat, Start Lon
 40.405, -111.79
 Stop Lat, Stop Lon
 40.235, -111.74
 Mean Lat, Mean Lon
 40.334, -111.79
 Start Pt, Stop Pt
 5010, 5499

Modelling the results with ISORROPIA

- Assumes thermodynamic Equilibrium

INPUT

Input units (0=umol/m³, 1=ug/m³) ;

1

Problem type (**0=forward**, 1=reverse); Phase state (0=solid+liquid, 1=metastable)

0, 1

NH₄-SO₄ system case

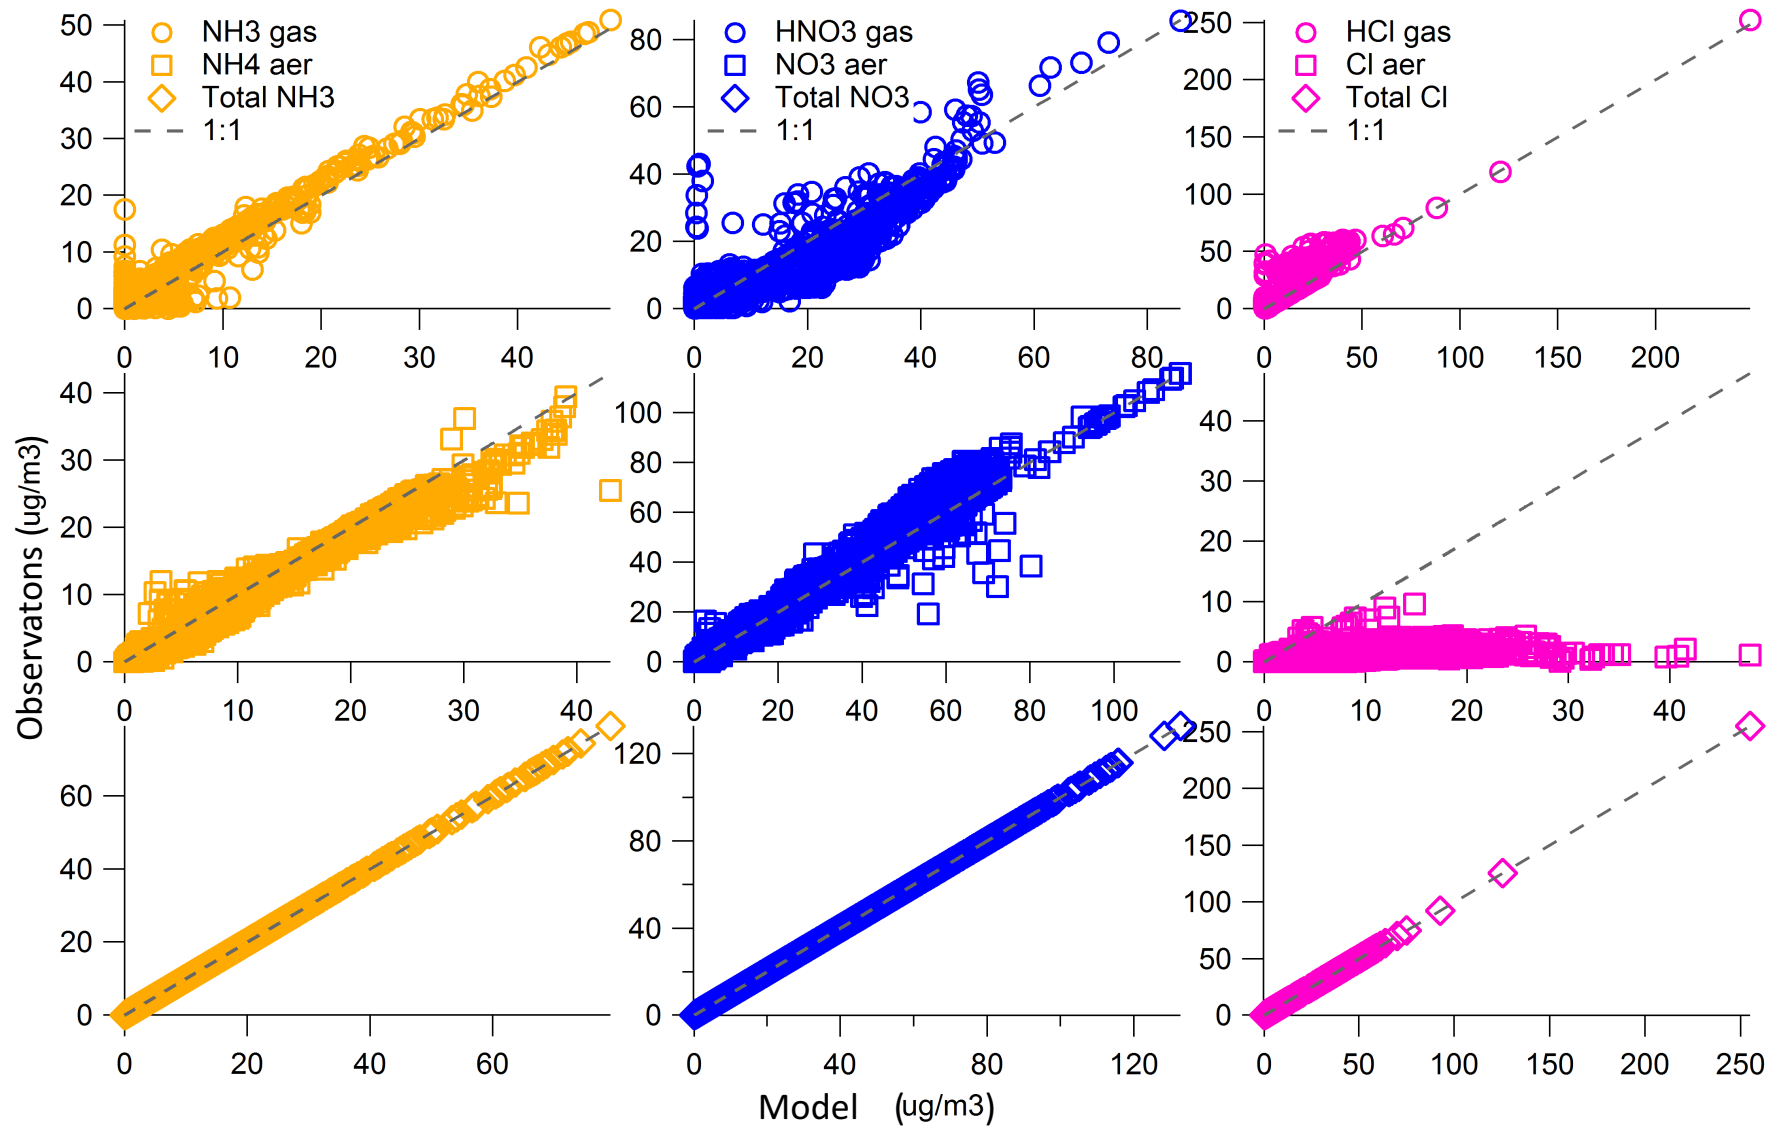

Na	SO ₄	NH ₃	NO ₃	Cl	RH	TEMP	
0	6.38441	14.3126	41.0481	2.52149	0.654	271.95	
0	6.04943	12.4858	39.9676	2.2952	0.668	271.53	
0	6.88014	15.2628	45.1649	2.50698	0.751	269.49	

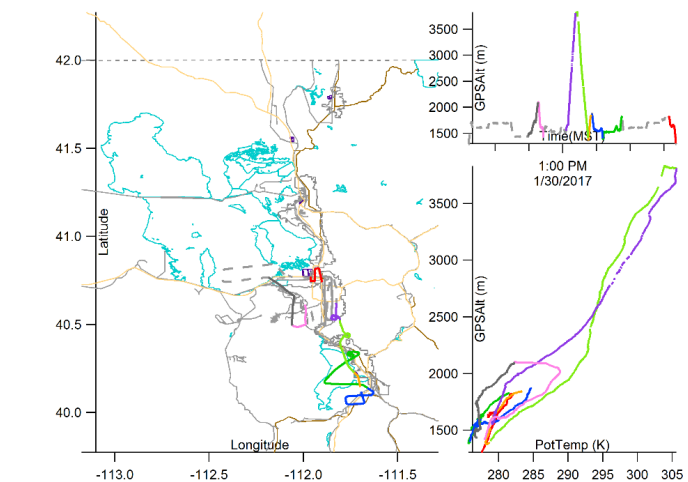

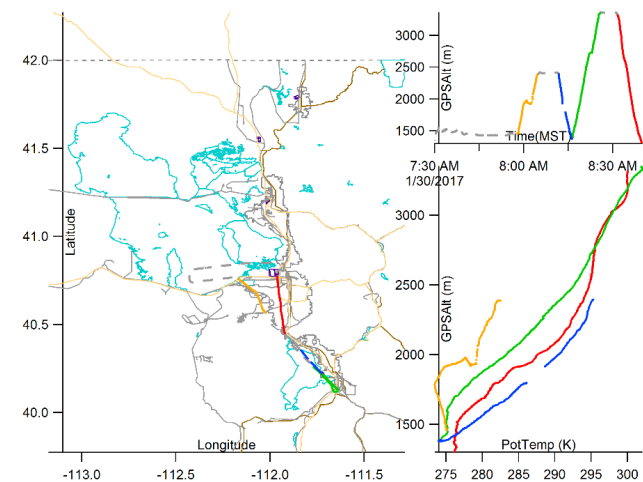

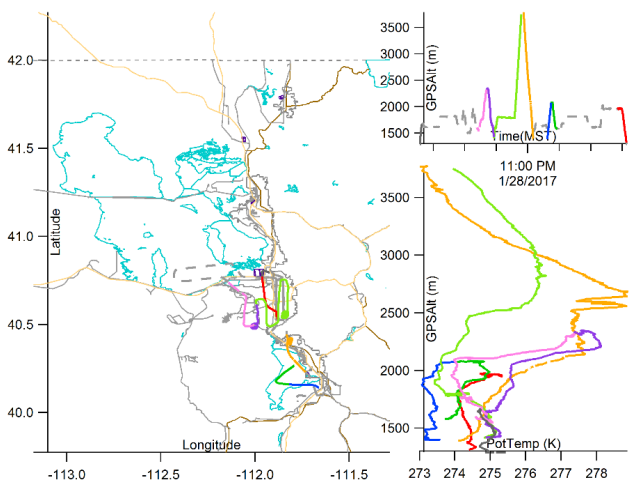

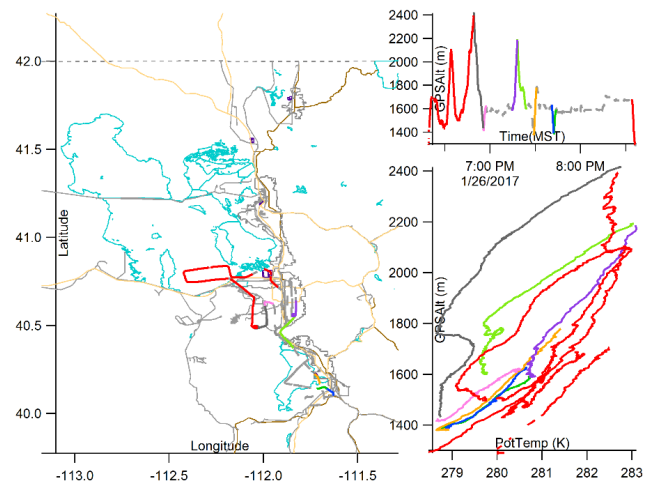

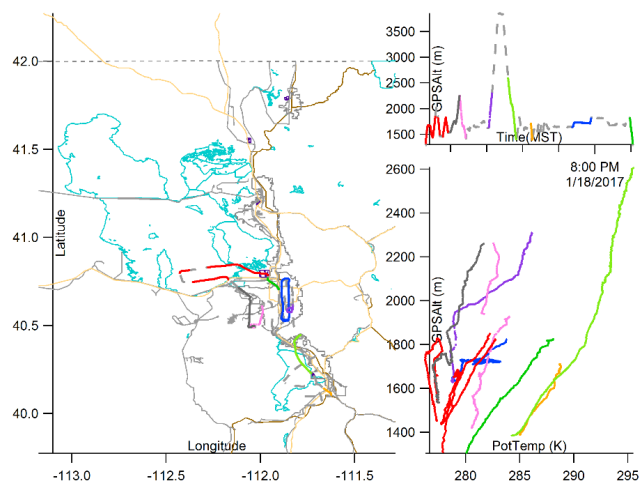

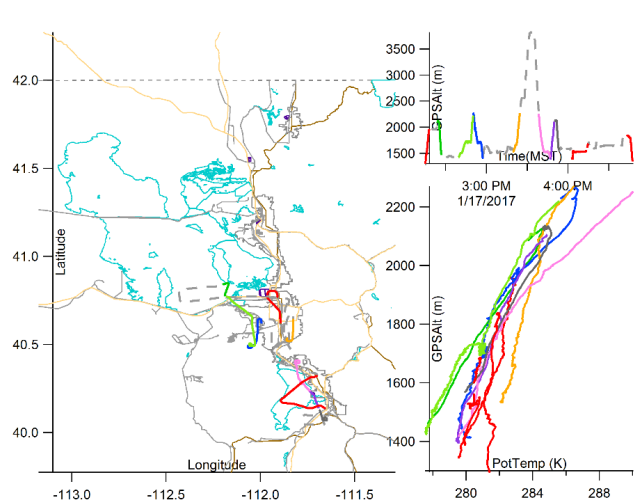

OUTPUT

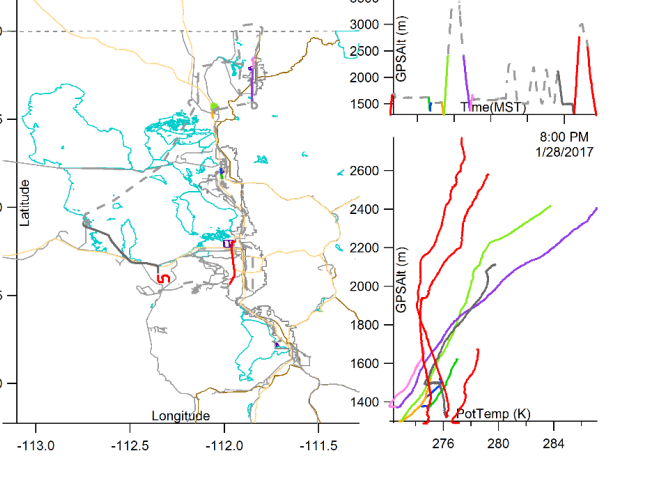

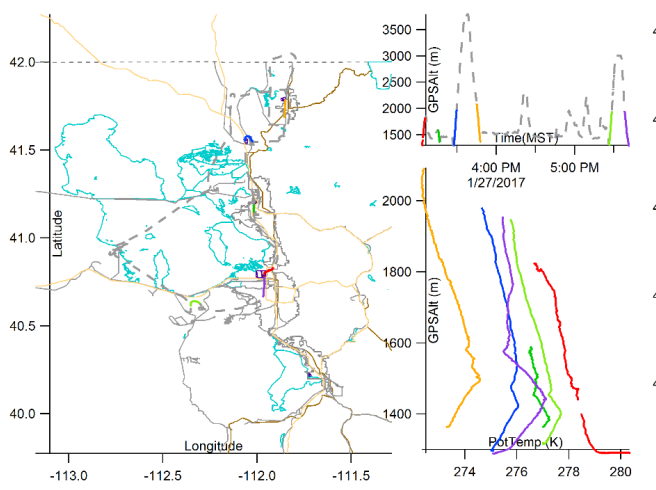

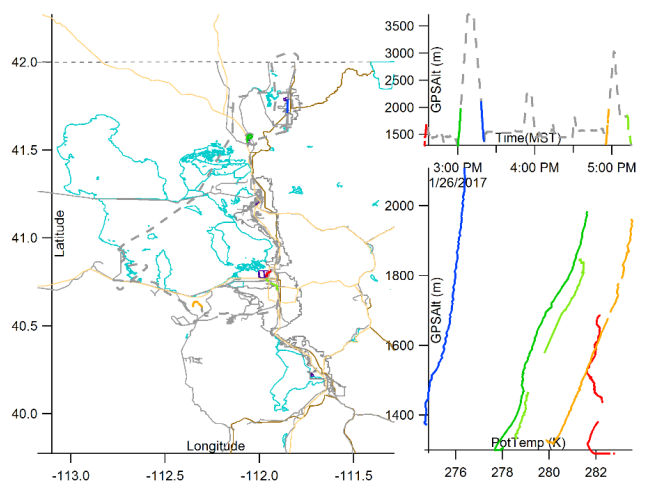

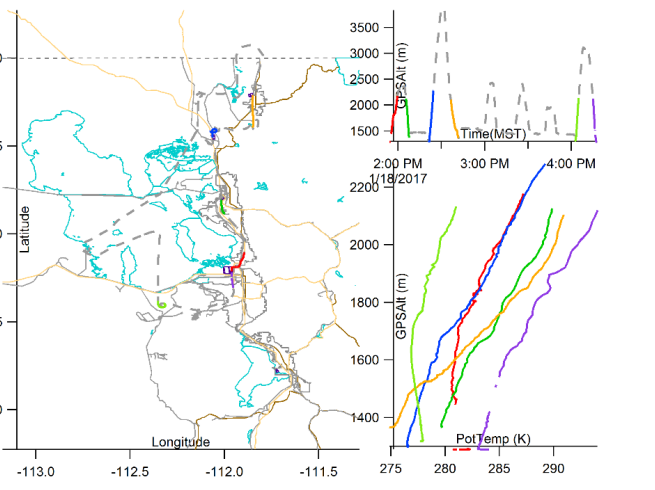

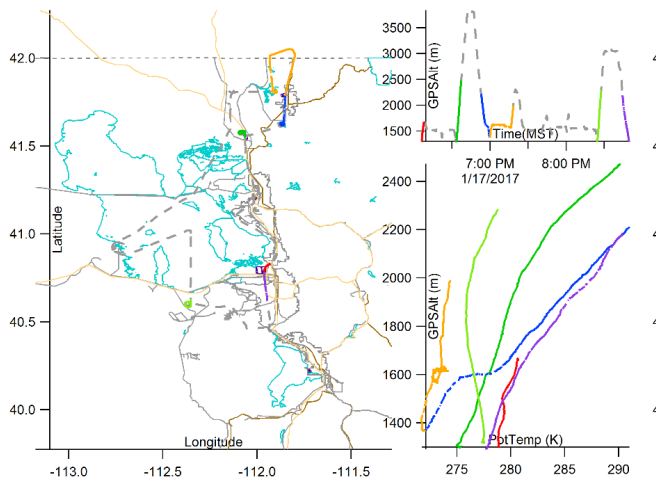

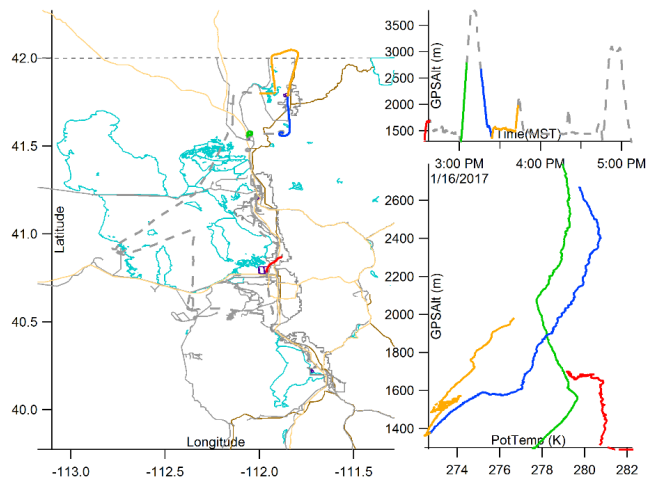

Gas phase: NH₃, HNO₃, HCl, H₂O

Liquid phase: NH₄⁺, Na⁺, H⁺, Cl⁻, NO₃⁻, SO₄²⁻, HSO₄⁻,
OH⁻, H₂O

Solid phase: (NH₄)₂SO₄, NH₄HSO₄, (NH₄)₃H(SO₄)₂,
NH₄NO₃, NH₄Cl, NaCl, NaNO₃, NaHSO₄,
H₂SO₄

Questions

- Are these coordinates correct?

Station Name	Station Lat	Station Lon
BR	41.4929	-112.018
BV	40.9029	-111.884
ED	40.5394	-112.3
HW	40.7344	-111.872
LN	40.3396	-111.713
MG	40.7068	-112.095
NP	40.2538	-111.663
O2	41.2069	-111.975
RP	40.7956	-111.931
SF	40.1363	-111.66
SM	41.8428	-111.852
H3	40.49641	-112.036
UU	40.73943	-111.979

What is a good indicator of inversion strength?
