

DR. GREGORY J. FROST**SUPERVISORY RESEARCH CHEMIST**

Chemical Sciences Laboratory (CSL), Office of Oceanic & Atmospheric Research (OAR), National Oceanic & Atmospheric Administration (NOAA), Boulder, Colorado. Gregory.j.frost@noaa.gov

Summary of Professional Achievements

Dr. Gregory Frost leads CSL's Regional Chemical Modeling Program, which uses observations and models to understand the impacts of atmospheric emissions and chemistry on air quality, weather, and climate. Dr. Frost is the Atmospheric Composition and Chemistry Liaison in NOAA's Office of Oceanic and Atmospheric Research. He manages the NOAA Earth's Radiation Budget Initiative, a Congressionally directed research program investigating natural and human activities that may alter the reflectivity of the atmosphere and impact the Earth system. Dr. Frost led the 2020 value assessment of an atmospheric composition capability on NOAA's Geostationary Extended Observations (GeoXO) Mission and leads the User Applications team for GeoXO's Atmospheric Composition Instrument, ACX.

Education

Doctor of Philosophy, Physical Chemistry, University of Colorado, Boulder, CO, 1995

Bachelor of Science, Chemistry, University of California, Berkeley, CA, 1989

Professional Employment History

2020 – present, Supervisory Research Chemist, NOAA CSL

2014 – 2020, Research Chemist, NOAA CSL

1997 – 2014, Research Scientist, University of Colorado, CIRES; Affiliate Scientist, NOAA Chem. Sci. Div.

1995 – 1997, NRC Postdoctoral Associate, NOAA Aeronomy Laboratory

1989 – 1995, Graduate Research Assistant, University of Colorado

Selected Publications (97 peer-reviewed articles, 10 first-authored, H-index = 43, cumulative citations = 9,367)
